## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-24 are allowed.
  2. The following is an examiner's statement of reasons for allowance: the prior art, either singly or in combination fails to anticipate or render obvious, the limitations of:
    - ...forming a gate, having a gate height greater than said fin height and intersecting said fin in a body area and separated therefrom by a gate insulator;  
**depositing a first temporary material up to a first level above the top of said fin and below said gate height;**  
forming a conformal layer over said gate; and using said conformal layer as a hardmask, etching said temporary material, thereby forming a composite gate cover said gate and exposing sides of said fins, as required by claim 1; and
    - ...forming a gate, having a gate height greater than said fin height and intersecting said fin in a body area and separated therefrom by a gate insulator;  
**depositing a first temporary material up to a first level at said gate height;**  
**recessing said temporary material to a height below said gate height and above fins;**  
forming a conformal cap over said gate and fins; and
    - using said conformal cap as a hardmask, etching said temporary material, thereby exposing said fins, as required by claim 13.
- The prior art states every limitation of the claimed invention except the use of a temporary material formed over the fin region.
